

ABSTRACT OF THE DISCLOSURE

Rack guides are provided for the rear corners of a dishwasher rack to minimize or eliminate lateral movement of the rack as the rack moves into and out of a dishwasher. In one embodiment, each guide includes a member with a base mounted on the rack and a
5 surface to engage the inner sidewall of the dishwasher tub. Legs are provided on the base to stabilize the rack guide. In an alternative embodiment, the guide includes a wheel rolling along the inner sidewall of the dishwasher tub.
